what it looks like. A B; What level of organization is shown in this picture?, The amoeba is a single celled organism so it's both a cell and an organism. What level of organization is shown in this picture?,

## **Quia - Organ Systems Matching**

Body systems are groups of organs and tissues that work together to perform important jobs for the body. Some organs may be part of more than one body system if they serve more than one function. Other organs and tissues serve a purpose in only one body system. Examples include the respiratory system, nervous system, and digestive system.
