Ammonia & Urea Datasheet - Nexant
Market Analytics: Ammonia and Urea - 2019 provides analysis and forecast to 2040 of supply and demand of the global ammonia and urea markets. This analysis identifies the issues shaping the industry as well as provide demand, supply and net trade data for 40 countries.

Market Analytics: Ammonia and Urea - 2019 | Nexant ...
Ammonia is the largest volume chemical produced from hydrocarbon feedstocks and is a key intermediate for fertilizers such as urea, ammonium nitrates, ammonium phosphates and compounds as well as a variety of industrial applications including synthetic resins (urea-based), synthetic fibres (acrylics and nylons), polyurethanes, explosives (ammonium nitrate-based) and refrigeration.

Ammonia and Urea - thinking.nexant.com
Profitability and Price Forecast: Ammonia and Urea - 2020 provides an analysis of industry profitability and pricing with forecasts to 2040 for the major price setting regions - Asia Pacific, Western Europe and the United States.

Profitability and Price Forecast: Ammonia and Urea - 2020 ...
dynamics for the fertilizer sector. Global ammonia and urea prices have fallen by more than 40 percent in the U.S. in the past two years as a result of global overcapacity, particularly from China, as well as from slow demand growth. Still, capacity expansions are underway. Nexant's Ammonia and Urea Annual Report 2016, which is part of

Ammonia and Urea Annual Report - 2016 - Nexant Subscriptions
Ammonia is the largest volume chemical produced from hydrocarbon feedstocks and is a key intermediate for fertilizers such as urea, ammonium nitrates, ammonium phosphates and compounds as well as a variety of industrial applications including synthetic resins (urea-based), synthetic fibres (acrylics and

Ammonia and Urea - Nexant Subscriptions
Report Overview Nexant's Quarterly Business Updates – Ammonia and Urea, which are part of the Strategic Business Analysis Fertilizers Program, provide an analysis of key developments in the ammonia and urea industry, including capacity updates, profitability, and pricing over the past quarter.

Quarterly Business Updates -Ammonia & Urea
Ammonia is the largest volume chemical produced from hydrocarbon feedstocks and is a key intermediate for fertilizers such as urea, ammonium nitrates, ammonium phosphates and compounds as well as a variety of industrial applications including synthetic resins (urea-based), synthetic fibres (acrylics and nylons), polyurethanes, explosives (ammonium nitrate-based) and refrigeration.

Ammonia and Urea - Nexant Subscriptions
Looking ahead, Nexant expects Africa will add about one to two million tons of ammonia capacity and urea capacity over the next ten years. The bulk of Africa's new capacity (over 70 percent) will be located in Egypt, whose current gas supply issues will be mitigated by the startup of the Zohr gas field.

Africa: Natural Gas and Fertilizer Sector Outlook | Nexant
Nexant provides clients with comprehensive data and insight in the chemical industries, key areas of expertise include: C1 Chemicals & Fertilizers. Ammonia. Urea. Melamine. Ammonium Nitrates.

Chemical Consulting | Nexant
This report discusses the process technologies and production economics for ammonia. The different process routes offered by major licensors are reviewed and include technologies by KBR, Haldor Topsøe, thyssenkrupp, Casale, and Linde. Production economics for the United States, Middle East, India, and China are assessed and regional market overviews are presented.

Ammonia (2019 Program) | Nexant Subscriptions
In addition, the principal application of ammonia and urea within the fertilizer sector is critical to agricultural production and the wider world economy. Natural gas based chemicals, namely ammonia, urea and methanol and derivatives have been monitored, studied, analyzed and reported by Nexant for over four decades.

Inorganic Chemicals and Fertilizers | Nexant Subscriptions
Nexant selected methanol and ammonia/urea production as the most appropriate monetisation option because: – The fertiliser value chain can be implemented on relatively small natural gas reserves. – Fertiliser is a good match with development objectives in Tanzania as the country is a large importer of urea fertiliser.

$1.5 billion Methanol and Urea plant in Tanzania ...
In Bolivia, YPFB's integrated ammonia/urea plant is currently under construction. The 400,000 ton ammonia plant is located in Bulo Bulo (in the department of Cochabamba). While the complex was set to come on-stream in the first quarter of 2016, the latest forecast is that the plant will begin production in the last quarter of this year.

How the South American Fertilizer Landscape has ... - Nexant
AMMONIA AND UREA PRODUCTION Urea (NH2CONH2) is of great importance to the agriculture industry as a nitrogen-rich fertiliser. In Kapuni, Petrochem manufacture a mmonia and then convert the majority of it into urea. The remainder is sold for industrial use.

Ammonia and Urea Production - NZ Institute of Chemistry
The report includes monthly price and profitability analysis for ammonia and urea with a detailed discussion on the market forces (affecting price and profitability) over the fourth quarter in the Ammonia and Urea Quarterly Business Update - Q4 2017 | Nexant Subscriptions

Ammonia and Urea Quarterly Business Update - Q4 2017 ...
Of the more than dozen new projects under consideration, Nexant believes that only 3 or 4 new world scale urea plants will come on-stream by 2025. Chambal Fertilizers and Chemicals' proposed gas based ammonia-urea complex in Kota, Rajasthan is in a fairly advanced stage (vs. other projects in India) and has a higher likelihood of materialization.

Outlook: India Natural Gas and Fertilizer Sector | Nexant
The Middle East is one of the largest producers of nitrogen fertilizers in the world, with an estimated ammonia production of close to 17 million t and urea production of 22 million t in 2016.
