This activity cannot be done unless Ant Picnic has been completed and students have their Ant Picnic data available. Students can manipulate data using Google Sheets or graphing paper depending on grade level and/or availability of technology. This is suited for students grades K-12. See instructions below.

Ant Picnic Data Discovery - Students Discover

Activity Description. Students will explore maps containing census data from 1950 through 2000. They will analyze how education levels and median household incomes have changed over time and determine how the two might be correlated. Students will also come up with ideas for policies that could help address issues related to income and education. Component ID: #t12114678256.
