When this book was first published in 1930, there was no shortage of excellent books dealing with the architectural styles of ancient Egypt; no book of any significance, however, discussed in detail the actual construction methods used to erect some of the world's most colossal and enduring structures. This profusely illustrated volume remedied that situation by providing the first important description and analysis of Egyptian building practices, which differed radically from those of ...

Ancient Egyptian Construction and Architecture by Somers ...

Ancient Egypt itself dates back to roughly 3150 BCE. However, Ancient Egyptian architecture did not become what we think of today until roughly 2649 BCE. Structures that survived the Old Kingdom, which lasted until about 2150 BCE, include mastabas, the Great Pyramids and the Great Sphinx. All of these structures were built from stone.

Ancient Egyptian Architecture

The ancient Egyptians built their pyramids, tombs, temples and palaces out of stone, the most durable of all building materials. Although earthquakes, wars and the forces of nature have taken their toll, the remains of Egypt's monumental architectural achievements are visible across the land, a tribute to the greatness of this civilization.

Egyptian civilization - Architecture

According to the historians, the Pyramids were constructed in Egypt during 2800-2400 BC and may be considered as the first large structure construction ever. The Great Wall of China that was constructed around 200 BC is considered another achievement of ancient civil engineering.
