Dental Laboratory Procedures Fixed Partial Dentures

Partial denture: A prosthesis that replaces one or more, but not all of the natural teeth and supporting structures. It is supported by the teeth and/or the mucosa. It may be fixed (i.e. a bridge) or removable. 2. Removable partial denture (RPD): A partial denture that can be removed and replaced in the mouth by the patient. 3.

Removable Partial Denture Manual

Dental assistants, who are credentialed, depending on their state, can perform most of these procedures except for the administration of local anesthesia and the preparation of the teeth. It looks like a laundry list of duties but, as this article demonstrates, by examining each step individually the assistant can accomplish the patient's ...

BEAUTIFUL, FUNCTIONAL, COMFORTABLE. Many people consider a Valplast Flexible Partial to be the most comfortable option for their denture and the final restoration can be made quickly and precisely!. Typically more affordable than fixed restorations and only a bit more than conventional dentures with visible metal clasps, Valplast offers a uniquely beautiful aesthetic quality that is unrivaled.

Valplast® Flexible Partials

Dental laboratory technicians use traditional or digital impressions or molds of a patient's teeth to create crowns, bridges, dentures, and other dental appliances. They work closely with dentists, but have limited contact with patients. Dental laboratory technicians work with small hand tools, such as files and polishers.

ADA Insurance Codes for Laboratory Procedures

The procedure for dentures starts with the dentist preparing the patient's mouth, which may include extractions, cleanings, or filing the natural teeth. After the mouth is prepared, digital X-rays and physical impressions will be taken and sent to a dental laboratory where custom dentures will be created.

For the laboratory construction of the removable partial denture following steps should be kept in mind: Presence of a properly prepared and articulated master cast. A diagnostic cast with a neat and specific design carefully drawn on it. A work authorization order covering all aspects of the desired denture must be given to the technician if the partial denture is being fabricated in a dental laboratory. Anything less will compromise quality of the partial denture. www.indiandentalacademy.com
