Phase change material cooling is now a hotspot in the field of battery thermal management. However, for promoting the practical application, the long-term durability of the phase change material module requires further evaluation, and thus, its relieving effect on the performance-deterioration of the battery module can be analyzed to further optimize the cooling structure of the actual battery ...

The purpose of this study was to investigate the durability of changes in preservice primary teachers' self-efficacy beliefs. Their science teaching self-efficacy was measured at the beginning and end of a science methods course, and then after a delay period of 9 months. Interviews were carried out 1 year after the end of the course.

The research gap for long-term durability data, eg, moisture effect, alkaline solution, fatigue, creep and physical degradation has been recognised in the community, eg, a lack of long-term data relevant to civil structures with a service life of 75–100 years, the major detrimental effect of the combined temperature, humidity and UV radiation are in particular vital to property deterioration, discolouring and deformation.

The durability of the real estate capital stock could hinder climate change adaptation because past construction anchors the population in beautiful and productive but increasingly-risky coastal areas. However, coastal developers anticipate that their assets face increasing risk and this creates an incentive to seek adaptation strategies.

Until the recent upsurge in lawsuits over mold, remarkably little attention was paid to building durability outside of a relatively small cadre of building science experts. The lack of interest in durability has frustrated many, including Joe Lstiburek, Ph.D., president of Building Science Corporation , based in Westford, Mass.

Lead, a soft, silvery white or grayish metal in Group 14 (IVa) of the periodic table. Lead is very malleable, ductile, and dense and is a poor conductor of electricity. Known in antiquity and believed by the alchemists to be the oldest of metals, lead is highly durable and resistant to corrosion.

The principle finding of this report is that both commercial and a novel material used for N95 mask filters can endure many cycles of disinfection by ozone gas (20 ppm for 30 minutes) without detectable degradation or loss of filtration efficiency. N95 masks and surgical masks (hereafter referred to as masks) typically use a filtration material fabricated from meltblown polypropylene.&nbsp; To ...
