Epidemiology is the study of the distribution and determinants of health-related states or events in specified populations and the application of this study to control health problems (1). However, in public health, the terms "field epidemiology" (2) and "applied epidemiology" (3)---which emphasize use of results in public health settings---define the practice of epidemiology at CDC.

Epidemiology and Public Health at CDC

Epidemiology is often considered the key scientific underpinning of public health practice. This pivotal role of epidemiology was emphasized by the Institute of Medicine in its definition of the substance of public health as organized community efforts aimed at the prevention of disease and promotion of health, with linkages to many disciplines and a scientific core of epidemiology (1 , 2).
