The File interface provides information about files and allows JavaScript in a web page to access their content. File objects are generally retrieved from a FileList object returned as a result of a user selecting files using the <input> element, from a drag and drop operation's DataTransfer object, or from the mozGetAsFile() API on an ...

File - Web APIs | MDN
For example, including /// <reference types="node" />in a declaration file declares that this file uses names declared in @types/node/index.d.ts;and thus, this package needs to be included in the compilation along with the declaration file. Use these directives only when you're authoring a d.tsfile by hand.

Triple-Slash Directives · TypeScript
Usually, that means JavaScript, although modeling HTML, SVG, or XML documents as objects are not part of the core JavaScript language, as such. The DOM represents a document with a logical tree. Each branch of the tree ends in a node, and each node contains objects. DOM methods allow programmatic access to the tree.

Document Object Model (DOM) - Web APIs | MDN
Returns the path for a specified file, folder, or drive. Size: For files, returns the size, in bytes, of the specified file; for folders, returns the size, in bytes, of all files and subfolders contained in the folder. Type: Returns information about the type of a file or folder (for example, for files ending in .TXT, "Text Document" is returned).

JavaScript Reference Guide - MarkLogic
The JavaScript reference serves as a repository of facts about the JavaScript language. The entire language is described here in detail. As you write JavaScript code, you'll refer to these pages often (thus the title "JavaScript reference"). If you're learning JavaScript, or need help understanding some of its capabilities or features, check out the JavaScript guide.

About the JavaScript reference - JavaScript | MDN
In JavaScript, most of the time there is no explicit type information available. Luckily, it is usually fairly easy to figure out a type given the surrounding code context. This process is called type inference. For a variable or property, the type is typically the type of the value used to initialize it or the most recent value assignment.

JavaScript IntelliSense - Visual Studio | Microsoft Docs
JavaScript (JS) is a lightweight, interpreted, or just-in-time compiled programming language with first-class functions. While it is most well-known as the scripting language for Web pages, many non-browser environments also use it, such as Node.js, Apache CouchDB and Adobe Acrobat.

JavaScript | MDN
if you double-click a script file with an extension that has no association, the Open With dialog box appears. Select wscript or cscript, and then select Always use this program to open this file type. This registers wscript.exe or cscript as the default script host for files of this file type.
