Chillers make cold water or water/glycol fluid mixture in order to cool buildings or processes. Often used in conjunction with coils in air handlers, chillers receive warm fluid from the air handler coil or process load, lower the temperature of the fluid, then a pump returns the fluid to the air handler coil or process.

Mcquay overhaul tips M#peh063-cbab  
Just wondering about the rear low speed shaft seal, on the proper way to replace it. Any other tips on rebuilding this machine would be great also being that this is my first mcquay and the service book for it really sucks.
