financial crises, argues that economists fundamentally misunderstand what they are, why they occur, and why there were none in the U.S. from 1934 to 2007. Misunderstanding Financial Crises offers a back-to-basics overview of financial crises, and shows that they are not rare, idiosyncratic events caused by a perfect storm of unconnected factors.

Abstract. Misunderstanding Financial Crises enriches the debate concerning the events of 2007–2008. The author challenges much of the conventional wisdom regarding financial crises and laments the tendency of mathematics to crowd history out of the study of economics. Eugene Fama, whom many regard as the father of modern finance,

was first a problem of political pressure to encourage the financing of subprime mortgages. Then, a huge recession came along and the house of cards came tumbling down.” This non-unconventional assessment is precisely what Yale economist Gary B. Gorton seeks to refute in *Misunderstanding Financial Crises*. He argues that the
