The manual used to train all officers in the United States, the NHTSA manual, contains the instructions and strict testing protocol for this test because it is believed to be strongly correlated with alcohol impairment at or above a .08% blood alcohol level. The HGN instructions from the manual read as follows:

Horizontal Gaze Nystagmus (HGN) Field Sobriety Test

The procedures outlined in this manual describe how the Standardized Field Sobriety Tests (SFSTs) are to be administered under ideal conditions in the field, because such conditions will not always exist. Even when administered under less than ideal conditions, they will generally serve as valid and useful indicators of impairment.

2006 NHTSA SFST Manual | Attorney General Karl A. Racine

The NHTSA Manual (National Highway Traffic Safety Administration DWI Detection & Standardized Field Sobriety Testing Participant Manual, 2015 Edition) contains extensive information concerning the three phases of OVI detection. Phase One is "vehicle in motion" and "the

MOTION TO SUPPRESS CHECKLIST

The three most common field sobriety tests in Arizona ("FSTs") are the Horizontal Gaze Nystagmus test, the Walk and Turn test, and the One-Leg Stand test. These three tests are standardized by the National Highway Traffic Safety Administration ("NHTSA"), which means they must be conducted the same way every time to be valid.
