The most important thing to note is that the pigeon is an incredibly widespread species that exists almost everywhere on the planet and they are most abundant where there are a lot of people living. Over the centuries, we have domesticated many pigeons and others just started coexisting with us.

## **Top 4 Best Pigeon Deterrents | Updated for 2020**

People domesticated pigeons, and brought them wherever they went as pets or for food. Pigeons are like rats, in the sense that they're good at breeding and surviving in lots of different environments. So the short answer is, people brought pigeons wherever they went, and the pigeons, who may have originally been domesticated, went feral.
