Hot air ballooning is the activity of flying hot air balloons. Attractive aspects of ballooning include the exceptional quiet, the lack of a feeling of movement, and the bird's-eye view. Since the balloon moves with the direction of the winds, the passengers feel absolutely no wind, except for brief periods during the flight when the balloon climbs or descends into air currents of different direction or speed. Hot air ballooning has been recognized by Fédération Aéronautique ...

Hot air ballooning - Wikipedia

JONNY PHILLIPS: Although ballooning has been around for a very long time, hot air balloons as we know them today, with their wicker baskets, propane burners, and teardrop shapes are really a relatively recent invention, dating in fact from the 1960s.
