Service Oriented Java Business Integration: Enterprise ...

This is where the new Java API for Integration—Java Business Integration (JBI) seeks attention. JBI provides a collaboration framework which has standard interfaces for integration components and protocols to plug into, thus allowing the assembly of Service Oriented Integration (SOI) frameworks following the Enterprise Service Bus (ESB) pattern.

Service Oriented Java Business Integration

Java Business Integration is a specification developed under the Java Community Process for an approach to implementing a service-oriented architecture. The JCP reference is JSR 208 for JBI 1.0 and JSR 312 for JBI 2.0. JSR 312 was removed from the JCP balloting process on 17 Dec, 2010 by the submitters without being accepted. JBI is built on a Web Services model and provides a pluggable architecture for a container that hosts service producer and consumer components. Services connect to the cont
