Nature is what we think of as pre-wiring and is influenced by genetic inheritance and other biological factors. Nurture is generally taken as the influence of external factors after conception, e.g., the product of exposure, life experiences and learning on an individual.

Nature Nurture in Psychology | Simply Psychology

Nature has two inter-related meanings in philosophy. On the one hand, it means the set of all things which are natural, or subject to the normal working of the laws of nature. On the other hand, it means the essential properties and causes of individual things.

Nature (philosophy) - Wikipedia

Even before the Anthropocene, humans used and interpreted nature. Our conceptions of nature are quite varied and have changed over the course of time. Nature not only provides us with what we need for our daily life, with food and resources; it is also a place to relax, a source of inspiration and dreams.
