You can try to connect your GPS to your computer and see if you can "repair" the TomTom (storage) memory (disk). That would usually just block off the bad areas, so that it will not be used. Then try downloading and installing the software and the map again. Tomtom GPS | Answered on Jul 11, 2019

Hi. I have a brand new Tomtom GO5200
(I guess it is manufactures a few years
ago, but just got it out of the box) and
the device shows that maps and
software are up to date (both from year
2016). It won't load even camera
updates.. Also GPRS is disconnected.
Serial number of the device is
ZB6376K01605.
